Prompt

Based on the excerpt, describe the obstacles the builders of the Empire State Building faced in attempting to allow dirigibles to dock there. Support your answer with relevant and specific information from the excerpt.

Essay

The builders of the Empire State building faced several obstacles throughout the building procedure. First, many of the dirigibles were filled with hydrogen gas rather than helium and "hydrogen is highly flammable." @CAPS1 following the German dirigle Hindenburg, Empire State Building owners "realize how much worse the accident could have been," and this resulted in the decision not to utilize the mast as a docking area. Also, when Al Smith decided to build the additional mooring mast onto the top of the building, due to the weight of the docking blimps, the architects had to invest "over @MONEY1" to modify the building's framework and enable it to support the weight of a dangling blimp @CAPS2, due to violent winds, the docking dirigibles could not properly land and "were constantly shifting." Lead weights couldn't be used because of the dangers and impracticalities the idea could set on the @LOCATION1 below. Finally, it seems that the overall safety and practicality of the mooring mast weren't easily attainable. Al Smith states himself that the engineers are "trying to dope out a practical, workable arrangement. Hence, the builders of the Empire State experienced many obstacles in attempting to allow dirigibles to dock on the building.
